Whitelist setup guide - Apple Mac OS X

**Step 1:**
From the Apple Menu click System Preferences > Parental Controls.

**Step 2:**
Click on the padlock icon to unlock the controls if they’re locked.

**Step 3:**
Click the + icon to create a new account with parental control settings.

**Step 4:**
Select the new account and then click on the web tab at the top of the dialogue box.

**Step 5:**
Select the “Allow access only to these websites” option and then use the + and - buttons to add and remove websites from the list.

**Step 6:**
Go to the apple menu and log out from your current account. Then log in to the new account with the active parental control settings when your child wants to use the internet.
